PROTECTION ON THE RUN

IRVINE, CA – Say “goodbye” to dirty, dog-eared, folded, and wrinkled blueprints forever!

EASI FILE Inc., the document handling, management and filing experts, today rolled out its newest product for the architectural-engineering market, *Easi Carrier*. *Easi Carrier* was previewed at the February 2003 World of Concrete trade show, where it was nominated for the “Most Innovative Product” award in the general construction equipment category.

The new *Easi Carrier* provides a convenient way to transport blueprints, maps, schematics, artwork, and other large documents to any worksite in any weather. The soft-sided case features a collapsible plastic liner that protects documents from wrinkles. The carrier takes the abuse of transportation, not your plans. It can be hung on a door for a presentation, and unfolds to make a hard surface for drawing, writing or note taking virtually anywhere, even on a tailgate or the hood of a truck.

Made from durable composition cloth, *Easi Carrier* has inside pockets for smaller documents and a zipper closure. It is available in 24” x 36” and 30” x 42” sizes. *Easi Carrier* easily replaces the cardboard tubes and rubber bands previously used to transport plans.

An added benefit of *Easi Carrier* is that it is designed to interface efficiently (**snap in and out in just 2 seconds!**) with EASI FILE’s award-winning cabinets to create a true organizational system. EASI FILE has become the standard for storage and retrieval of materials in architectural, engineering and other ‘large document’ environments worldwide.

For additional information on *Easi Carrier* or EASI FILE, see the web site at www.easifileusa.com, or contact Brad Barrett at 949-855-4121.
